Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

07/09/15

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

- 3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

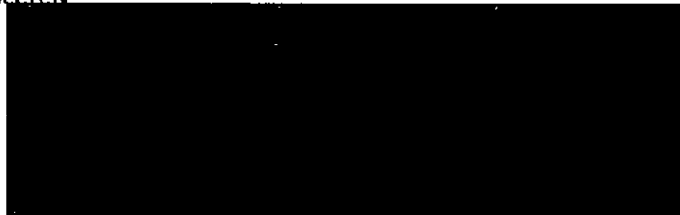

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

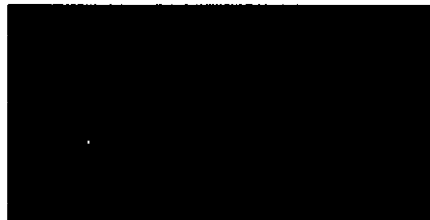

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

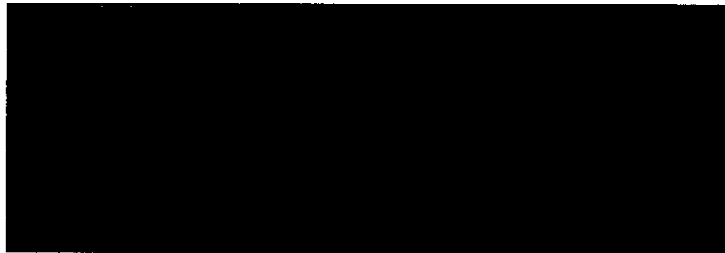

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

3) Noise and rowdy behaviour of patrons is of great concern, whilst it is accepted that the behaviour of patrons once they have left the premises is not necessarily the responsibility of the licensee, it is undeniable that excitable and intoxicated patrons leaving the club have the potential to behave in an anti-social manner. For example, shouting, singing, slamming of car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the clubs location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

Dear Sirs

Application for Extended Licensing Hours at Skelmersdale Social Club

We would like to object to the application made by Sarju Patel and Daniel Kenyon for extended opening hours.

In recent years this club, under different names had been granted extended opening hours to the detriment of the local residents. We have had to endure noise, disruption, urinating in the street and vandalism to our properties and cars.

This club is set in the middle of residential houses. There is no way of keeping noise to a minimum when people are leaving the building, as we all know what alcohol can do in raising the noise level.

We attended a meeting organised by the owners of this club and they advised that they are applying for this extension to its licence to try and capture the people who are leaving public houses that close at 11.00pm and people coming home from Ormskirk after closing hours. This in itself would be a time bomb waiting to go off as these people would already have had enough alcohol to drink in the premises that they are leaving and trouble would only be a couple of pints away.

The owners of the club do not have any interest in the local people as they have openly told us that the permission that was granted by the Council to demolish and build flats in its place is not profitable enough for them, so they will not go ahead with the building the flats but wish to extend their opening hours instead to make more profit within a short time span.

From the application form filled in by the applicants Solicitor it would appear that every box available has been ticked in order to get the application granted. There is no reason from Monday to Thursday 10.00 am till 01.00am and Friday to Saturday extended till 02.00 am for Panto, theatrical performances, darts and wrestling, dancing by staff and refreshments (food) to be served till this hour in the morning.

If this application were to be granted the local residents would have no peace. There will be noise until all hours of the morning, when we have to get up for work. Also our vehicles and property would be damaged. In recent years we ourselves have had two vehicles damaged by people leaving the club. There is very little parking facilities at the club, so punters park their cars outside of our houses or garages which again is a nuisance and inconvenient when we have trouble parking ourselves and the noise of people banging their car doors late into the night and starting engines. This will also encourage drink driving and if they do not use their own vehicles then the noise from taxis dropping off and picking up at all hours is a nuisance in an extremely built up area. Also locking

up the premises after everyone has left followed by the staff leaving would again extend the duration of noise.

We have lived in this area for at least 32 years and it has never proven to be a good move by extending opening hours, when the old opening hours were until 10.30pm mid week and 11.00pm weekends which is a vast difference to what is being applied for now.

The police presence would have to be ten fold, At present it is nil.

We would urge you to please look back at this clubs history and the trouble which the residents have endured in the past and reject the application being made.

Why in todays society have we got to endure a late night bar/night club in a high density residential area?

Yours sincerely

Ian Scott

BY HAND

Dear Sirs,

Re: Premises application by Skelmersdale Social Club

I write with regard to the application by Sarju Patel and Daniel Kenyon to extend the licensing hours at Skelmersdale Social Club. I hereby give consent for this letter, the body of which was written by my wife and seconded by myself, to be seen by the applicants.

As a local resident may I begin by referring to page 3 of the application section 3.A and stating I was grateful for the meeting at the site on 2nd July 2015 where plans were laid out and attempts certainly made to appease residents' concerns. I also appreciate the owners' plans for investment as it is not the most attractive building and aesthetic improvements will be welcomed by my husband and me. So, perhaps, will the plans to open the premises to the general public as we will hopefully be able to invite friends to a venue which will hopefully be more upmarket than other premises in Skelmersdale. Whilst this paragraph may not be considered by the licensing panel I have included it so as not to appear vexatious – the thought of more noise and inconvenience has undeniably stirred emotions amongst the community, however I personally would not wish anyone not to succeed in business and leave the building to rot. Whilst many residents have purchased their properties whilst the club has been open (unfortunately we purchased ours when the club had been closed and planned for redevelopment) and should therefore be somewhat accepting, may I respectfully voice my concerns at the proposed extended hours:

With regard to **the prevention of crime and disorder** I, like many people, am concerned that longer permitted hours will equal more alcohol consumed which will equal a rise in crime and disorder. Police have been called to the club on numerous occasions, there have been fights and arguments outside the property and further up streets outside people's houses and incidents of car crime. Obviously it is not possible to hold the owners or licensee to account as these incidents occurred outside the walls of the premises or *possibly not* by patrons of the club in which case who is there to object and therefore document it to? 'Mornings after' have often included calls to neighbours comparing our experiences in the early hours! I understand from residents longer at their properties than ourselves that disruption is less than it has been in previous years (I understand the club was closed at one point?) and for which we are grateful to Mr David Webster. On reading on this matter in Christopher Snowden's *Drinking, Fast and Slow* (May 2015) I see there has been a country-wide general decline in alcohol-related crime however we know our area and hold realistic concerns.

With regard to **public safety**, we fear stepping out at say 1am (or proposed later) to ask intoxicated people to be more quiet or move on. Despite the proposed plans to assist patrons into taxis there will always be walkers and longer opening hours will equal more people. Secondly, there is already disruption caused by cars parking at the site and whilst efforts will be made to attract customers via taxi, I can only see more cars attending the site. My access is via the side of the club and I cannot always see what is coming up and down Witham Road (so have to edge out) or pedestrians due to the parked cars.

With regard to the **protection of children**, in the past there has often been broken glass along pavements near to the club. I understand that no glass would be allowed out of the premises; I merely voice previous experience and future concern. My eldest child (4) has been awoken by the sound of arguments and expletives before now and how I do explain it? Again, I fear more alcohol will lead to more of this behaviour from which I wish to protect my children. Families with young children live metres from the current door and planned door and I do not feel later licensing hours with the attraction of more possible alcohol and therefore more footfall in such a residential area is conducive to their safety.

Lastly, in relation to the **prevention of public nuisance** I urge you to consider the local demographic. In addition to the consideration of young families, there are many elderly and disabled inhabitants - some living on their own - that simply do not deserve to be dealt extra disruption and not so late of a night time. This is not an area with a large student or young professional population - those, one may argue, that stereotypically stay up later or that are partying themselves. My neighbours, for example, are elderly and not mobile enough to clear up the vomit that I have had to clear up from my garden in the past. I am not meaning to be frivolous here but I do not have dates as I have not wished to keep a record. I would suggest that every neighbour in the vicinity has a similar story to tell - not ones of recordable disorder, rather those of nuisance. I also once heard on my baby's monitor the sound of running water - when I went to see what it was it was a man urinating in my garden. There are constantly cigarette butts and often takeaway containers, bottles etc outside the surrounding properties. I also query the taxi situation - if there are 100 people at the end of service waiting for taxis, and staff will keep said customers inside for 30 minutes after close of the bar, if as many as 4 people get into each one that's 25 taxis and therefore nearly 1 per minute of the 30 minutes extra time - that is a lot of vehicle noise! At the end of the extra time I am concerned leftover patrons will be asked to leave and wait outside - outside the homes of residents.

I thank you in advance of your consideration of my concerns and urge you to please reject the application.

Yours faithfully,

Christopher Andrews

Dear Sirs

Application for Extended Licensing Hours at Skelmersdale Social Club

We would like to object to the application made by Sarju Patel and Daniel Kenyon for extended opening hours.

The club is set in the middle of a residential area and extended hours would cause disruption and noise to the local area.

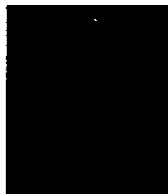

The owners of the club are not interested in the local residents, only in making the club more profitable for their pockets.

Please say no to extended opening hours so that we can live normal lives without the worry of sleepless nights, damaged properties and damaged cars as we know from previous times when the club has extended opening hours and parties, this is the outcome.

The club has previously been closed down due to its rowdiness, noise from music, noise at closing time and fighting. Why now should it be aloud to open later to again put the local residents through hell. A lot of the local residents are elderly and disabled and do not need the upset and disruption that this licence extension would bring. Again we would like to reiterate that this is a residential area, with the closest of properties being approximately 4 foot away from the premises. Why should we have to endure the endless noise and arguing that this club will most definitely cause. Not only noise from people drinking in the club and exiting the club, but noise from people loitering awaiting for taxis at all hours of the evening/morning. In some cases a wait of up to and above of one hour can be the norm. There is also a large number of children that live in the area and because our local streets will be used as a short cut to the club, the safety of the children will be put at risk from Strangers.

We urge you please review the clubs history and the trouble caused in previous years and reject this application.

Yours sincerely

The club is set in the middle of a residential area and extended hours would cause disruption and noise to the local area.

The owners of the club are not interested in the local residents, only in making the club more profitable for their pockets.

Please say no to extended opening hours so that we can live normal lives without the worry of sleepless nights, damaged properties and damaged cars as we know from previous times when the club has extended opening hours and parties, this is the outcome.

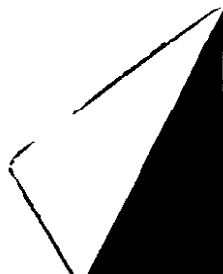

The club has previously been closed down due to its rowdiness, noise from music, noise at closing time and fighting. Why now should it be aloud to open later to again put the local residents through hell. A lot of the local residents are elderly and disabled and do not need the upset and disruption that this licence extension would bring. Again we would like to reiterate that this is a residential area, with the closest of properties being approximately 4 foot away from the premises. Why should we have to endure the endless noise and arguing that this club will most definitely cause. Not only noise from people drinking in the club and exiting the club, but noise from people loitering awaiting for taxis at all hours of the evening/morning. In some cases a wait of up to and above of one hour can be the norm. There is also a large number of children that live in the area and because our local streets will be used as a short cut to the club, the safety of the children will be put at risk from Strangers.

We urge you please review the clubs history and the trouble caused in previous years and reject this application.

Yours sincerely

Mrs. S. Briscoe,
2 Witham Road,
Skelmersdale.
WN8 8HW

Dear Sirs

Re: Application for extended licensing hours at Skelmersdale Social Club, Witham Road, Skelmersdale

We wish to object to the above application made by Mr Sarju Patel and Mr Daniel Kenyon.

- 1) The club is situated in a residential area, the nearest houses are only metres away from the premises. We are concerned that live music, recorded music and parties until the early hours will cause a noise nuisance to local residents.

On page 10 of the application (the prevention of public nuisance) the applicant states that "live music shall not be permitted on consecutive days except where the licensing hours are continued from one day to another which crosses midnight" and that "live music by amplified instruments shall be permitted on no more than 26 occasions per year"

By implication, this suggests that even the applicants accept that live music or loud recorded music has the potential to cause a noise nuisance.

- 2) Contrary to the description of the premises, on page three of the application, there are no car parking facilities at the club. At present, there is unmarked space for approximately 5/6 cars. This area will reduce as the club entrance is moved as according to the plans submitted. The only parking is in adjacent roads, e.g. Witham Road, Hutton Road and Marchbank Road. These are all narrow roads, there is often barely enough room for residents to park their vehicles. The lack of a car park will result in taxis and other vehicles having to turn and manoeuvre in the adjacent narrow roads, causing hazards to pedestrians leaving the club, other traffic and will increase the noise levels.

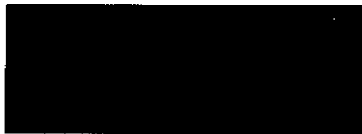

There is also a very narrow alley alongside the club which allows residents access to garages etc. to the back of their properties. Vehicles parked in this area will cause nuisance to these residents.

Currently, the club regularly hosts parties etc. on Saturday and Sunday afternoons and evening and this leads to traffic disruption. If cars are parked on both sides of the road, problems could be caused for emergency vehicles to access the road. As the club is situated close to give-way junctions on Hutton and Marchbank Road, visibility at these junctions will be impaired by stationary cars. The visibility problem is compounded by the fact that the club is situated on a bend in the road.

car doors, fighting, vomiting and urinating in public areas and damaging property. There are already problems of this nature at the current closing times on Friday and Saturday nights, despite signage already in place requesting that patrons leave quietly and respect the club's neighbours. This noise and anti-social behaviour will continue until 2:30am and beyond as the applicants have requested that the premises stay open until this time to allow patrons to wait for taxis. These timings will increase by one hour on bank holiday weekends etc. should the license extension be granted. Anti-social behaviour has therefore, the potential to continue well into the small hours of the morning. Furthermore, due to the club's location there are no alternative routes of dispersal for patrons leaving the premises on foot other than walking along pavements, in very close proximity to residents' houses.

We urge you to reject this application on the grounds outlined above.

Yours sincerely

(I confirm that this letter
can be disclosed to the
Applicants)
