Subject: Noise nuisance

Ongoing problems see below.

I have been woken up on continuous occasions recently by drunken revellers in the early hours

Two weeks ago as an example, Monday at approx 11pm 47 students walked screaming shouting drunk down station road heading for train station to get last train to Liverpool. It was 'Carnage night'. Every other night that week been woken between 2am and 2.45am by transient . traffic screaming/shouting/drunken. We are keeping log sheets. One girl was lying in the gutter! She was carried home by a young man who asked her where she lived. Another ' lone female ' staggered up station road at 3am this morning. I watched her to make sure she was safe! Log number 095 28/05/13 a recent example . EMRO,s need to be seriously considered to allow residents a life.
