Do you agree with our shortlist of projects? Traffic flow definitely needs improvement. Please give consideration to the creation of a model boating lake in Church Fields
Which two projects should we select? Coronation Park Traffic signal improvements in Ormskirk Town Centre
Are there any other projects on the IDS we should consider?
Are there any other infrastructure schemes we should consider?

Do you agree with our shortlist of projects? I recently registered my concerns over Thompson Avenue/Charlesbye park and the way parts of it was removed and never replaced. I was informed that there were 2 other parks we could use for where we live - Coronation Park and one in Westhead, at 1.3 miles and 21 minutes on foot and 1.7 miles and 30+ minutes away respectively. I found this to be an absolutely ridiculous response when we can see Charlesbye Park from our bedroom! I don't believe it even needs anywhere near as much money as is being pledged spending on it. Regardless, the years of play value it would provide is priceless. Coronation Park doesn't need any more money spending on it (again!) - look after the local areas and support outdoor play and exercise.

Do you agree with our shortlist of projects? Coronation Park regularly receives money and upgrades, and does not require/deserve any more. The children's play area near Thompson Ave serves a very large local community. It was reduced some time ago and has never been updated. This deserves funding. Any improvements to traffic flow in Ormskirk town centre would be welcome. I do not see any need for cycle facilities between bus and train stations. The proposed route is not amenable to cycles and would endanger pedestrians. Improved pedestrian facilities would be welcome, but at present there is not even sufficient lighting at night.

Representation
Do you agree with our shortlist of projects? Coronation park doesn't need anymore money spending on it. Thompson Avenue Park is near so many residential areas and was removed and never replaced which is a huge shame. All of the traffic signals in ormskirk need reviewing! The pedestrian/cycle path between the bus station and train station would only be improved by removing the trees which would be harmful to the environment and wildlife so not a realistic option. The lighting isn't switched on when it's dark anyway so what's the point?
Which two projects should we select? Thompson Avenue Look after local families - replace the park at Thompson avenue!!! So many families, 2 schools, massive potential and encouraging outdoor play and imagination.

Do you agree with our shortlist of projects? £40,000 to play area improvements at Thompson Avenue should be the greatest priority to deliver. I have 2 young children and there is not a local park that we can just walk to. When we purchased our house there was a park there, this was taken away and not replaced. How when I went to take my children out to play we have to drive and can not just pop out to the park.

Do you agree with our shortlist of projects? .The play area at Thompson Avenue desperately needs attention with facilities for a wide age range
Which two projects should we select? Coronation Park Thompson Avenue

Representations received on the Ormskirk Neighbourhood Portion (Oct-Nov 2018)

Traffic signal improvements in Ormskirk Town Centre

The Thompson Avenue play area needs serious consideration to ensure the gangs aren't attracted there - it needs to be really well lit and also a path to walk around the edge of the field to avoid the inevitable dog fouling

The play area would benefit from being fenced off like coronation park to prevent access to dogs

Do you agree with our shortlist of projects?

It's vitally important to promote walking and cycling alternatives to driving in order to reduce traffic around Ormskirk. The link between bus station and railway station, in conjunction with work to connect to Edge Hill and up to Burscough will go a long way to making cycling a better, safer experience.

Which two projects should we select?

Cycle and pedestrian link between the bus and rail station

Do you agree with our shortlist of projects?

Enhanced cycle and pedestrian link (including I hope safer crossing across Moor Street) for bus and train commuters.

Coronation Park duck pond - clean up and enhancement.

Traffic system to reduce congestion - looking forward to the longer term enhancement plan.

Do you agree with our shortlist of projects?

Traffic signal co-ordination to stop to the gridlock is the no1. priority. Visitors are being discouraged from coming to Ormskirk because of this.

ID152 - Improvements to cycle and pedestrian link between Ormskirk bus and train station.

Are there any other projects on the IDS we should consider?

Too much money is being spent in Ormskirk - more should be invested in surrounding neighbourhoods such as Skelmersdale.

Do you agree with our shortlist of projects?

All have merits , but I have most experience of the last , the link between the train and bus stations

Which two projects should we select?

Traffic signal improvements in Ormskirk Town Centre

Cycle and pedestrian link between the bus and rail station

Other

The pedestrian link from the train station is often the first glimpse visitors get of our town . It has had an air of decay and neglect , not a good advert for Ormskirk .

Thompson Avenue

Traffic signal improvements in Ormskirk Town Centre

Cycle and pedestrian link between the bus and rail station

I feel Coronation Park is a well used facility throughout the year. Better to invest in other areas.

Are there any other projects on the IDS we should consider?

I believe serious considerations to get rid of paying to park in Ormskirk town centre. At least make market days free to park. We hear of hardship on the high street, but encouraging more people into the town will boost the high street. Some of the car pa
